

RT101 CPT CODING FOR CYTOPATHOLOGY

James P. Almas, MD, FCAP
Susan E. Spires, MD, FCAP

Learning Objectives

- Be conversant with cytopathology CPT codes, gynecologic and non-gynecologic, and know the clinical situations that apply to the use of each.
- Understand and review complex coding cases and how to discriminate between bundled, multiply billable and add on codes.
- Understand the use and necessity of ICD 9 CM codes and the correct coding for gynecologic and non-gynecologic specimens.
- Be aware of the Medicare Advanced Beneficiary Notification (ABN) rules and the proper use and documentation for ABNs.
- Understand the Correct Coding Initiative (CCI), the limits and requirements that CCI places on coding for payment and the use of Mutually Exclusive and Comprehensive Edits.
- Be aware of new and emerging cytologic technologies and their coding.
