

## Products and Services Price List

CONTENT	Annual fee with two releases/year
<b>Allergen Subset:</b> Includes more than 10,000 concepts for allergens including drugs, foods, animals, plants and occupational substances that are important for CPOE, e-prescribing and decision support for allergy checking. The content is supplied in a machine-readable flat list that requires the SNOMED CT International Release for full representation of concept names and relationships.	<b>\$500</b>
<b>Anatomic Pathology Subset:</b> Includes approximately 7,600 members of anatomic pathology content from SNOMED CT. Updated in conjunction with each SNOMED CT International Release, it reflects the most commonly used concepts in anatomic pathology. Includes anatomical concepts, morphologic abnormalities, specimens, and other relevant SNOMED CT anatomic pathology content areas.	<b>\$1000</b>
<b>Non-Human Subset:</b> Identifies more than 5,000 SNOMED CT concepts used exclusively to represent non-human concepts such as fin, claw and hoof. Note that this is not a veterinary subset that would also include concepts shared with humans such as brain and heart. The subset may be used to identify concepts that some applications might want to exclude.	<b>\$800</b>
<b>CAP electronic Cancer Checklists (CAP eCC):</b> The College of American Pathologists electronic Cancer Checklists (CAP eCC) are structured summary reports that enable the collection of cancer data elements essential for patient care and selection of treatment protocols. The XML format aids integration into information systems and enables electronic interoperability. The cancer content contained within the CAP eCC uses more than 2,000 encoded SNOMED CT concept ID's to describe specific procedures, specimens, and morphologic abnormalities.	<b>Contact your Account Manager or <a href="mailto:snomedolutions@cap.org">snomedolutions@cap.org</a></b>
MAPPINGS	Annual Royalty
<b>NANDA Nursing Map:</b> NANDA International map to SNOMED CT contains NANDA Taxonomy II nursing diagnoses concepts that describe a patient's reactions to disease or injury. <b>2003-2004 edition (includes 16 new diagnoses from 2007-2008 edition)</b>	<b>\$1500</b>
<b>NIC Nursing Map:</b> Nursing Interventions Classification map to SNOMED CT contains nursing intervention labels that describe treatments that a nurse performs to enhance patient outcomes. <b>4<sup>th</sup> Edition</b>	<b>\$1500</b>
<b>NOC Nursing Map:</b> Nursing Outcomes Classification map to SNOMED CT contains nursing-sensitive outcome labels that reflect a patient state, behavior or perception that is measured along a continuum. <b>3<sup>rd</sup> Edition</b>	<b>\$1500</b>
<b>PNDS Nursing Map:</b> The Perioperative Nursing Data Set map to SNOMED CT contains nursing diagnoses, intervention and outcome concepts that describe the perioperative patient experience from pre-admission until discharge. <b>2<sup>nd</sup> Edition</b>	<b>\$1500</b>
<b>CCC Nursing Map:</b> The Clinical Care Classification map to SNOMED CT contains nursing diagnoses, outcome qualifiers and intervention concepts that can be utilized to document home health and ambulatory care.	<b>\$1500</b>
<b>Omaha System Nursing Map (Elsevier-2005 Edition):</b> The Omaha System map to SNOMED CT consists of the Problem Classification Scheme, supporting objective and subjective evidence of physical, psychosocial, and environmental health problems. Includes Intervention Scheme categories and targets used to support the description of practice in community health, long-term care, and other settings.	<b>\$1500</b>

SNOMED CT SUBSET KIT	Per Release
<p><b>SNOMED CT Subset Kit:</b> A kit for developing and maintaining SNOMED CT subsets that includes software and a collection of documents for individuals and organizations intending to create subsets of the SNOMED CT terminology. Subsets provide a flexible mechanism to allow customized selection of concepts and descriptions for ease of use in different countries, clinical specialties and different purposes. The Subset Kit consists of the following components:</p> <ul style="list-style-type: none"> <li>• <b>Subset Planning Guide</b> – a document to help users manage the process of creating a subset of SNOMED CT. This guide is intended for those responsible for creating the specifications for the subset and the maintenance strategy.</li> <li>• <b>Subset Development Guide</b> – a document to help users create and implement subsets of SNOMED CT. It provides a single reference point for all the relevant information about subsets found in the SNOMED CT Technical Reference Guide and Technical Implementation Guide. Topics covered include what a subset is, types of subsets and when they are used, and technical file specifications.</li> <li>• <b>Subset Editor User Guide</b> – a document for individuals working hands-on with the Subset Editor software described below. It explains how to use the software and its capabilities and options.</li> <li>• <b>Subset Editor</b> – a software tool that facilitates the creation of subsets, both through the use of rules to identify subset members and by the direct identification of subset members. The subset tables and files generated from the software are aligned with the SNOMED CT subset specifications.</li> </ul> <p>The Subset Editor works in conjunction with the CLUE-5 Runtime Terminology Browser, which is included in the Kit. It also requires a “Namespace Identifier,” issued by SNOMED International that enables creation of subsets with identifiers that are unique to the organization. Other software requirements include MS Access 2000 (or later), Windows 95 or later (2000 or XP recommended).</p>	<b>\$5000 Per User</b>
<p><b>SNOMED CT Subset Kit Update:</b> Previous purchase of the Subset Kit required; updated with each SNOMED CT release.</p>	<b>\$1000 Per User</b>
SERVICES (training, education and consulting)	Per person
LIVE CLASSROOM SESSIONS (on site at CAP STS or other location as requested)	
<p><b>SNOMED CT Introductory Class:</b> Two-day class designed to meet the needs of health care systems developers, software analysts, programmers and clinical staff who implement SNOMED CT and need to build applications around the SNOMED CT data tables.</p>	<b>\$1195/person</b>
<p><b>SNOMED CT Proposed Release Format Changes:</b> One-day class will include information on: reasons for proposed release format changes; what changes are being made to better support history tracking on all SNOMED CT components; how the new reference set mechanism provides more benefits than the subset mechanism; and why you need transitive closure and how it is built.</p>	<b>\$750/person</b>
<p><b>SNOMED CT and Nursing Content:</b> One and a half day class designed to focus on: basic elements of SNOMED CT; major hierarchies in SNOMED CT and their relevance to nursing-related content; primary use case for the choice of SNOMED CT for use in nursing practice; role of ANA-recognized nursing classification systems within EHR systems to represent nursing knowledge; content integration and knowledge representation; nursing maps; assessment concept model; Clue browser; and SNOMED CT’s request submission process. Attendees will be offered: cardiovascular assessment hands-on experience; individual mapping project (optional); and group discussion and input regarding potential coding dilemmas.</p>	<b>\$995/person</b>

## Products and Services Price List

<p><b>SNOMED CT: Encoding Standardized Nursing Documentation:</b> One-day class designed to expand the users' understanding of SNOMED CT in clinical nursing documentation. The course builds on previous SNOMED educational offerings and focuses on the use of SNOMED CT in standardized documentation templates.</p>	<p><b>\$750/person</b></p>
<p><b>SNOMED CT Master Class:</b> One-day class is designed to expand the users' prior knowledge of SNOMED CT. This course builds on previous SNOMED educational offerings and covers techniques needed to support information retrieval, pre and post coordination and subsumption testing.</p>	<p><b>\$750/person</b></p>
<p><b>WEB TELECONFERENCES/SELF-DIRECTED LEARNING</b></p>	<p><b>Per person</b></p>
<p><b>Introduction to Terminology and Classifications:</b> A self-directed learning course that defines terminology and classifications frequently encountered during the implementation of an electronic health record (EHR). National and international standards and regulations that relate to the implementation of standard terminologies and classifications within an EHR will be reviewed.</p>	<p><b>Self-directed learning: \$150/person</b></p>
<p><b>SNOMED Clinical Terms Basics:</b> 60-minute Web-teleconference program will help you gain a more in-depth understanding of the need for SNOMED CT and its content and structure. The program is designed for professionals involved in selection, implementation and use of clinical terminology that have little to no knowledge of SNOMED CT nor have taken a formal introductory course. <b>Self-directed learning version is at your own pace: SNOMED CT An Introduction.</b></p>	<p><b>Web Teleconference: No charge</b></p> <p><b>Self-directed learning SNOMED CT An Introduction: \$90/person</b></p>
<p><b>SNOMED CT Concept Model:</b> 90-minute Web-teleconference program will help you gain a better understanding of SNOMED CT from a content perspective. It addresses: history and development of SNOMED CT; what is a clinical terminology?; basic elements of SNOMED CT; what is the SNOMED CT terminology model?; logical definitions; and queries and logical definitions. <b>Self-directed learning version is at your own pace.</b></p>	<p><b>Web Teleconference: \$225/person</b></p> <p><b>Self-directed learning: \$150/person</b></p>
<p><b>SNOMED CT Distribution Format Model:</b> 90-minute Web-teleconference program will help you gain a better understanding of SNOMED CT from a technical perspective. It includes information on: history and development of SNOMED CT; what is a clinical terminology?; basic elements of SNOMED CT; relational model; subset mechanism; cross mapping mechanism; optimizing table structures; and queries. <b>Self-directed learning version is at your own pace.</b></p>	<p><b>Web Teleconference: \$225/person</b></p> <p><b>Self-directed learning: \$150/person</b></p>
<p><b>Coding Clinical Data: SNOMED CT Terminology and Information Model Interactions:</b> 90-minute Web-based overview will help you gain a better understanding of SNOMED CT interactions with information models, using the HL7 RIM as the primary example.</p>	<p><b>Web Teleconference: \$225/person</b></p>
<p><b>Context Model for SNOMED CT® Expressions:</b> 90-minute Web-based overview will help you gain a better understanding of the use of the context model for SNOMED expressions.</p>	<p><b>Web Teleconference: \$225/person</b></p>
<p><b>Introduction to Mapping.</b> A self-directed learning course that builds on the foundation laid in previous courses: Introduction to Terminology and Classifications (self-directed learning (SDL) format), SNOMED CT An Introduction (SDL format), SNOMED Clinical Terms Basics (Web teleconference format), and SNOMED CT Concept Model (SDL and Web teleconference formats). It provides an overview of how SNOMED CT content is mapped to other code sets, classification systems, and reference terminologies, as well as how those terminologies are mapped to SNOMED CT.</p>	<p><b>Self-directed learning: \$150</b></p>

## Products and Services Price List

<p><b>SNOMED CT: An Introduction to Mapping:</b> 90-minute Web-teleconference program will help you gain a more in-depth understanding of the need for mappings between SNOMED CT and other works (classifications and terminologies). The program will address: relevance of SNOMED CT in mapping; purpose of mapping in SNOMED CT; principles of SNOMED CT mapping development; the role of SNOMED CT mapping in the US integrated model for terminology deployment; SNOMED CT's Mapping Working Group; and impact in the HER.</p>	<p style="text-align: right;"><b>Web Teleconference:</b> <b>\$225/person</b></p>
<p><b>SNOMED CT in Pathology and Cancer Registry Work:</b> 90-minute Web-teleconference program will address SNOMED CT's content coverage for use in anatomic pathology and surgical pathology cancer summaries as adapted from the College of American Pathologist's Cancer Protocols. The program will cover: issues surrounding SNOMED II to SNOMED CT conversion including ICD-O v.2 to ICD-O v.3; SNOMED CT-encoded cancer checklists (surgical pathology case summaries); and SNOMED CT's Surgical Pathology Working Group.</p>	<p style="text-align: right;"><b>Web Teleconference:</b> <b>\$225/person</b></p>
<p><b>SNOMED CT: An Introduction to Nursing Content:</b> 90-minute Web-teleconference program will introduce you to nursing content in SNOMED CT; provide an overview of how SNOMED CT standardizes the concepts that nurses need for reporting and retrieving nursing-specific data; and how nursing content serves the diverse needs of nursing professionals. <b>Self-directed learning version is at your own pace.</b></p>	<p style="text-align: right;"><b>Web Teleconference:</b> <b>\$225/person</b></p> <p style="text-align: right;"><b>Self-directed learning:</b> <b>\$150/person</b></p>
<p><b>Tailored services (training, education and consulting)</b></p>	<p style="text-align: right;"><b>Contact your Account Manager or</b> <a href="mailto:snomedolutions@cap.org">snomedolutions@cap.org</a></p>
