

Products and Services Price List

CONTENT	Annual fee with two releases/year
Allergen Subset: Includes more than 10,000 concepts for allergens including drugs, foods, animals, plants and occupational substances that are important for CPOE, e-prescribing and decision support for allergy checking. The content is supplied in a machine-readable flat list that requires the SNOMED CT Core Content for full representation of concept names and relationships.	\$500
Anatomic Pathology Subset: Includes approximately 7,600 members of anatomic pathology content from SNOMED CT. Updated in conjunction with each SNOMED CT International Release, it reflects the most commonly used concepts in anatomic pathology. Includes anatomical concepts, morphologic abnormalities, specimens, and other relevant SNOMED CT anatomic pathology content areas.	\$1000
Non-Human Subset: Identifies more than 5,000 SNOMED CT concepts used exclusively to represent non-human concepts such as fin, claw and hoof. Note that this is not a veterinary subset that would also include concepts shared with humans such as brain and heart. The subset may be used to identify concepts that some applications might want to exclude.	\$800
CAP electronic Cancer Checklists (CAP eCC): The College of American Pathologists electronic Cancer Checklists (CAP eCC) are structured summary reports that enable the collection of cancer data elements essential for patient care and selection of treatment protocols. The XML format aids integration into information systems and enables electronic interoperability. The cancer content contained within the CAP eCC uses more than 2,000 encoded SNOMED CT concept ID's to describe specific procedures, specimens, and morphologic abnormalities. MAPPINGS	Annual Royalty
NANDA Nursing Map: NANDA International map to SNOMED CT contains NANDA Taxonomy II nursing diagnoses concepts that describe a patient's reactions to disease or injury. 2003-2004 edition (includes 16 new diagnoses from 2007-2008 edition)	\$1500
NIC Nursing Map: Nursing Interventions Classification map to SNOMED CT contains nursing intervention labels that describe treatments that a nurse performs to enhance patient outcomes. 4th Edition	\$1500
NOC Nursing Map: Nursing Outcomes Classification map to SNOMED CT contains nursing-sensitive outcome labels that reflect a patient state, behavior or perception that is measured along a continuum. 3rd Edition	\$1500
PNDS Nursing Map: The Perioperative Nursing Data Set map to SNOMED CT contains nursing diagnoses, intervention and outcome concepts that describe the perioperative patient experience from pre-admission until discharge. 2nd Edition	\$1500
CCC Nursing Map: The Clinical Care Classification map to SNOMED CT contains nursing diagnoses, outcome qualifiers and intervention concepts that can be utilized to document home health and ambulatory care.	\$1500
Omaha System Nursing Map (Elsevier-2005 Edition): The Omaha System map to SNOMED CT consists of the Problem Classification Scheme, supporting objective and subjective evidence of physical, psychosocial, and environmental health problems. Includes Intervention Scheme categories and targets used to support the description of practice in community health, long-term care, and other settings.	\$1500

SNOMED CT SUBSET KIT	Per Release
<p>SNOMED CT Subset Kit: A kit for developing and maintaining SNOMED CT subsets that includes software and a collection of documents for individuals and organizations intending to create subsets of the SNOMED CT terminology. Subsets provide a flexible mechanism to allow customized selection of concepts and descriptions for ease of use in different countries, clinical specialties and different purposes. The Subset Kit consists of the following components:</p> <ul style="list-style-type: none"> • Subset Planning Guide – a document to help users manage the process of creating a subset of SNOMED CT. This guide is intended for those responsible for creating the specifications for the subset and the maintenance strategy. • Subset Development Guide – a document to help users create and implement subsets of SNOMED CT. It provides a single reference point for all the relevant information about subsets found in the SNOMED CT Technical Reference Guide and Technical Implementation Guide. Topics covered include what a subset is, types of subsets and when they are used, and technical file specifications. • Subset Editor User Guide – a document for individuals working hands-on with the Subset Editor software described below. It explains how to use the software and its capabilities and options. • Subset Editor – a software tool that facilitates the creation of subsets, both through the use of rules to identify subset members and by the direct identification of subset members. The subset tables and files generated from the software are aligned with the SNOMED CT subset specifications. <p>The Subset Editor works in conjunction with the CLUE-5 Runtime Terminology Browser, which is included in the Kit. It also requires a “Namespace Identifier,” issued by SNOMED International that enables creation of subsets with identifiers that are unique to the organization. Other software requirements include MS Access 2000 (or later), Windows 95 or later (2000 or XP recommended).</p>	\$5000 Per User
<p>SNOMED CT Subset Kit Update: Previous purchase of the Subset Kit required; updated with each SNOMED CT release.</p>	\$1000 Per User
SERVICES (training, education and consulting)	Per person
LIVE CLASSROOM SESSIONS	
<p>SNOMED CT Training Class: Two-day training class (on site at CAP headquarters) designed to meet the needs of health care systems developers, software analysts, programmers and clinical staff who implement SNOMED CT and need to build applications around the SNOMED CT data tables.</p>	\$1195/person
<p>SNOMED CT Proposed Release Format Changes: One-day class (on site at CAP headquarters) will include information on: reasons for proposed release format changes; what changes are being made to better support history tracking on all SNOMED CT components; how the new reference set mechanism provides more benefits than the subset mechanism; and why you need transitive closure and how it is built.</p>	\$750/person
<p>SNOMED CT and Nursing Content: One and a half day class (on site at CAP headquarters) designed to focus on: basic elements of SNOMED CT; major hierarchies in SNOMED CT and their relevance to nursing-related content; primary use case for the choice of SNOMED CT for use in nursing practice; role of ANA-recognized nursing classification systems within EHR systems to represent nursing knowledge; content integration and knowledge representation; nursing maps; assessment concept model; Clue browser; and SNOMED CT’s request submission process. Attendees will be offered: cardiovascular assessment hands-on experience; individual mapping project (optional); and group discussion and input regarding potential coding dilemmas.</p>	\$995/person

Products and Services Price List

SNOMED CT: Encoding Standardized Nursing Documentation: One-day class designed to expand the users' understanding of SNOMED CT in clinical nursing documentation. The course builds on previous SNOMED educational offerings and focuses on the use of SNOMED CT in standardized documentation templates.	\$750/person
SNOMED CT Master Class: One-day class (on site at CAP headquarters) is designed to expand the users prior knowledge of SNOMED CT. This course builds on previous SNOMED educational offerings and covers techniques needed to support information retrieval, pre and post coordination and subsumption testing.	\$750/person
SNOMED CT and Structured Product Labeling (SPL): One-day class (on site at CAP headquarters) offers more basic information on SNOMED CT and its use in the SPL as mandated by the U.S. Food & Drug Administration. Includes hands-on coding exercise.	\$995/person
WEB TELECONFERENCES/SELF-DIRECTED LEARNING	Per person
SNOMED Clinical Terms Basics: 60-minute Web-teleconference program will help you gain a more in-depth understanding of the need for SNOMED CT and its content and structure. The program is designed for professionals involved in selection, implementation and use of clinical terminology that have little to no knowledge of SNOMED CT nor have taken a formal introductory course. Self-directed learning version is at your own pace.	Web Teleconference: No charge Self-directed learning: \$90/person
SNOMED CT Concept Model: 90-minute Web-teleconference program will help you gain a better understanding of SNOMED CT from a content perspective. It addresses: history and development of SNOMED CT; what is a clinical terminology?; basic elements of SNOMED CT; what is the SNOMED CT terminology model?; logical definitions; and queries and logical definitions. Self-directed learning version is at your own pace.	Web Teleconference: \$225/person Self-directed learning: \$150/person
SNOMED CT Data Structure (Relational) Model: 90-minute Web-teleconference program will help you gain a better understanding of SNOMED CT from a technical perspective. It includes information on: history and development of SNOMED CT; what is a clinical terminology?; basic elements of SNOMED CT; relational model; subset mechanism; cross mapping mechanism; optimizing table structures; and queries. Self-directed learning version is at your own pace.	Web Teleconference: \$225/person Self-directed learning: \$150/person
Coding Clinical Data: SNOMED CT Terminology and Information Model Interactions: 90-minute Web-based overview will help you gain a better understanding of SNOMED CT interactions with information models, using the HL7 RIM as the primary example.	\$225/person
Context Model for SNOMED CT® Expressions: 90-minute Web-based overview will help you gain a better understanding of the use of the context model for SNOMED expressions.	\$225/person
SNOMED CT: An Introduction to Mapping: 90-minute Web-teleconference program will help you gain a more in-depth understanding of the need for mappings between SNOMED CT and other works (classifications and terminologies). The program will address: relevance of SNOMED CT in mapping; purpose of mapping in SNOMED CT; principles of SNOMED CT mapping development; the role of SNOMED CT mapping in the US integrated model for terminology deployment; SNOMED CT's Mapping Working Group; and impact in the electronic health record.	\$225/person

Products and Services Price List

<p>SNOMED CT in Pathology and Cancer Registry Work: 90-minute Web-teleconference program will address SNOMED CT's content coverage for use in anatomic pathology and surgical pathology cancer summaries as adapted from the College of American Pathologist's Cancer Protocols. The program will cover: issues surrounding SNOMED II to SNOMED CT conversion including ICD-O v.2 to ICD-O v.3; SNOMED CT-encoded cancer checklists (surgical pathology case summaries); and SNOMED CT's Surgical Pathology Working Group.</p>	<p>\$225/person</p>
<p>SNOMED CT: An Introduction to Nursing Content: 90-minute Web-teleconference program will introduce you to nursing content in SNOMED CT; provide an overview of how SNOMED CT standardizes the concepts that nurses need for reporting and retrieving nursing-specific data; and how nursing content serves the diverse needs of nursing professionals. Self-directed learning version is at your own pace.</p>	<p>Web Teleconference: \$225/person</p> <p>Self-directed learning: \$150/person</p>
<p>An Introduction to SNOMED CT and its use in Structured Product Labeling (SPL): 90-minute Web-teleconference begins to assist in understanding SNOMED CT and its use in the SPL as mandated by the U.S. Food & Drug Administration.</p>	<p>\$225/person</p>
<p>Tailored services (training, education and consulting)</p>	<p>Contact your Account Manager or snomedolutions@cap.org</p>
