

Products and Services Price List

CONTENT	Annual fee with two releases/year
<p>Allergen Subset: Includes more than 10,000 concepts for allergens including drugs, foods, animals, plants and occupational substances that are important for CPOE, e-prescribing and decision support for allergy checking. The content is supplied in a machine-readable format and requires access to the International Release of SNOMED CT from the International Health Terminology Standards Development Organisation (IHTSDO) for full representation of concept names and relationships.</p>	\$750
<p>Anatomic Pathology Subset: Includes approximately 7,600 members of anatomic pathology content from SNOMED CT. Updated in conjunction with each SNOMED CT IHTSDO Release, it reflects the most commonly used concepts in anatomic pathology. Includes anatomical concepts, morphologic abnormalities, specimens, and other relevant SNOMED CT anatomic pathology content areas. The content is supplied in a machine-readable format and requires access to the International Release of SNOMED CT from the International Health Terminology Standard Terminology Organisation (IHTSDO) for full representation of concept names and relationships.</p>	\$1000
<p>CAP electronic Cancer Checklists (CAP eCC): The College of American Pathologists (CAP) cancer protocols and checklists (included in the CAP Cancer protocols) are recognized as a “gold standard” in cancer case summary reporting. These guidelines, developed by the CAP Cancer Committee in collaboration with cancer experts such as oncologists, surgeons, and other health care professionals, aid pathologists in cancer reporting. The synoptic, or standardized, checklist format provides consistent and meaningful information that enable health care professionals to retrieve, share, compare, and study clinical data necessary to help improve patient care.</p> <p>The CAP eCC is the electronic version of the more than 70 checklists in an XML (Extensible Markup Language) format. The format enables interoperability among disparate information systems that share cancer data and reports. The checklists, encoded with SNOMED CT allow for further semantic interoperability by allowing multiple interdisciplinary providers to accurately communicate and share patient information within an electronic health record (EHR) system.</p>	<p>Contact your Account Manager or capecc@cap.org snomedolutions@cap.org</p>
MAPPINGS	Annual Royalty
<p>CCC Nursing Map: The Clinical Care Classification map to SNOMED CT contains nursing diagnoses, outcome qualifiers, and intervention concepts that can be utilized to document in all clinical setting, e.g., inpatient, home health and ambulatory care.</p>	\$1,500
<p>NANDA I Nursing Map: NANDA International map to SNOMED CT contains NANDA Taxonomy II nursing diagnoses concepts that describe a patient's reactions to disease or injury. 2007-2008 edition includes 16 new diagnoses</p>	\$1,500

Products and Services Price List

NIC Nursing Map: Nursing Interventions Classification map to SNOMED CT contains 542 nursing intervention labels that describe comprehensive research-based treatments that a nurse performs to enhance patient outcomes. 5th Edition	\$1,500
NOC Nursing Map: Nursing Outcomes Classification map to SNOMED CT contains a comprehensive patient/client outcomes used to evaluate the effects of nursing interventions measured along a continuum. 4th Edition	\$1,500
Omaha System Nursing Map (Elsevier-2005 Edition): The Omaha System map to SNOMED CT consists of the Problem Classification Scheme and signs and symptoms supporting objective and subjective evidence of physical, psychosocial, and environmental health problems. Includes Intervention Scheme categories and targets used to support the description of practice in community health, long-term care, and other settings. Includes problem rating scale for outcomes.	\$1,500
PNDS Nursing Map: The Perioperative Nursing Data Set map to SNOMED CT contains nursing diagnoses, interventions and outcomes concepts that describe the perioperative patient experience from pre-admission until discharge. 2nd Edition	\$1,500
SERVICES (education and consulting)	Per person
Live Classroom Sessions (on site at CAP STS or other location as requested)	
SNOMED CT Introductory Class: Two-day training class designed to meet the needs of health care systems developers, software analysts, programmers, and clinical staff who implement SNOMED CT and need to build applications around the SNOMED CT data tables.	\$1,195/person
SNOMED CT Master Class: One-day class is designed to expand the user's prior knowledge of SNOMED CT. This course builds on previous SNOMED educational offerings and covers techniques needed to support information retrieval, pre- and post-coordination and subsumption testing.	\$750/person
SNOMED CT Nursing Content: One and a half day class designed to focus on: basic elements of SNOMED CT; major hierarchies in SNOMED CT and their relevance to nursing-related content; primary use case for the choice of SNOMED CT for use in nursing practice; role of ANA-recognized nursing classification systems within EHR systems to represent nursing knowledge; content integration and knowledge representation; nursing maps; assessment concept model; Clue browser; and SNOMED CT's request submission process. Attendees will be offered: cardiovascular assessment hands-on experience; individual mapping project (optional); and group discussion and input regarding potential coding dilemmas.	\$995/person
SNOMED CT Procedure Modeling: One and a half day class designed to strengthen the user's understanding of procedure modeling in SNOMED CT. The course also provides users the opportunity to learn how to model procedure content. The course builds on previous SNOMED knowledge and is targeted for intermediate to advanced users of SNOMED CT.	\$1,500/person

Products and Services Price List

<p>SNOMED CT Proposed Release Format Changes: One-day class includes information on: reasons for proposed release format changes; what changes are being made to better support history tracking on all SNOMED CT components; how the new reference set mechanism provides more benefits than the subset mechanism; and why you need transitive closure and how it is built.</p>	<p>\$750/person</p>
<p>SNOMED CT Standardized Nursing Documentation Encoding: One-day class designed to expand the user's understanding of SNOMED CT in clinical nursing documentation. The course builds on previous SNOMED educational offerings and focuses on the use of SNOMED CT in standardized documentation templates.</p>	<p>\$750/person</p>
<p>WEB TELECONFERENCES / SELF-DIRECTED LEARNING</p>	<p>Per person</p>
<p>Introduction to Terminology and Classifications: Self-directed learning course for professionals who are incorporating standardized terminologies and classifications into an electronic health information system, among other uses. Standardized terminologies and classifications used to capture, retrieve, exchange, and understand data will be reviewed. This interactive, on-line course aims to help learners gain an understanding of standardized terminology frequently encountered during the development and implementation of an electronic health record.</p>	<p>Self-directed learning: \$150/person</p>
<p>SNOMED CT CliniClue Browser: 60-minute Web-teleconference program will introduce participants to how to use the CliniClue Browser to search against SNOMED CT. This course will provide a detailed demonstration of the browser and how to perform semantic searching techniques to support accurate mappings. Semantic and lexical matches will be reviewed. Objectives: demonstrate specific browser features and functionality; demonstrate searching techniques to achieve accurate semantic mappings; and define the difference between semantic and lexical matches.</p>	<p>Web Teleconference: \$225/person</p>
<p>SNOMED CT Basics (FREE): 60-minute Web teleconference-based program offered monthly will help learners gain a more in-depth understanding of the need for SNOMED CT and its content and structure. Terminology use cases to help achieve Meaningful Use criteria will be demonstrated. The program is designed for professionals involved in selection, implementation, and use of clinical terminology who have little or no knowledge, nor have taken a formal introductory course. This course is offered at no charge. This course is also offered in Spanish. Self-directed learning version is at your own pace.</p>	<p>Web Teleconference: No charge</p> <p>Self-directed learning SNOMED CT An Introduction: \$90/person</p>
<p>SNOMED CT Coding Clinical Data; Terminology and Information Model Interactions: 90-minute Web teleconference-based overview will help learners gain a better understanding of SNOMED CT interactions with information models, using the HL7 RIM as the primary example.</p>	<p>Web Teleconference: \$225/person</p>
<p>SNOMED CT Concept Model: 90-minute Web-teleconference program will help learners gain a better understanding of SNOMED CT from a content perspective. It addresses history and development of SNOMED CT; what is a clinical terminology; basic elements of SNOMED CT; what is the SNOMED CT terminology model; logical definitions; and how to run queries on logical definitions. Self-directed learning version is at your own pace.</p>	<p>Web Teleconference: \$225/person</p> <p>Self-directed learning: \$150/person</p>

Products and Services Price List

<p>SNOMED CT Context Model for SNOMED CT Expression: 90-minute Web teleconference will help learners gain a better understanding of the use of the context model for SNOMED CT expressions.</p>	<p style="text-align: right;">Web Teleconference: \$225/person</p>
<p>SNOMED CT Distribution Format: 90-minute Web-teleconference will help learners gain a better understanding of SNOMED CT from a technical perspective. It includes information on history and development of SNOMED CT; what is a clinical terminology; basic elements of SNOMED CT; relational model; subset mechanism; cross-mapping mechanism; optimizing table structures; and queries. Self-directed learning version is at your own pace.</p>	<p style="text-align: right;">Web Teleconference: \$225/person</p> <p style="text-align: right;">Self-directed learning: \$150/person</p>
<p>SNOMED CT Introduction to Mapping: 90-minute Web teleconference will help learners gain a more in-depth understanding of the need for mappings between SNOMED CT and other works (classifications and terminologies). The program will address: relevance of SNOMED CT in mapping; purpose of mapping in SNOMED CT; principles of SNOMED CT mapping development; the role of SNOMED CT mapping in U.S. integrated model for terminology deployment; SNOMED CT's Mapping Working Group; and impact in the electronic health record. Self-directed learning version is at your own pace.</p>	<p style="text-align: right;">Web Teleconference: \$225/person</p> <p style="text-align: right;">Self-directed learning: \$150/person</p>
<p>SNOMED CT Introduction to Nursing Content: 90-minute Web-teleconference program will introduce learners to nursing content in SNOMED CT; provide an overview of how SNOMED CT standardizes the concepts that nurses need for reporting and retrieving nurse-sensitive data; and explain how nursing content serves the diverse needs of nursing professionals. Self-directed learning version is at your own pace.</p>	<p style="text-align: right;">Web Teleconference: \$225/person</p> <p style="text-align: right;">Self-directed learning: \$150/person</p>
<p>SNOMED CT Pathology and Cancer Registry Work: 90-minute Web teleconference will address SNOMED CT's content coverage for use in anatomic pathology and surgical pathology cancer summaries as adopted from the CAP's Cancer Protocols. The program will cover issues surrounding SNOMED II to SNOMED CT conversion, including ICD-O v.2 to ICD-O v.3; SNOMED CT-encoded cancer checklists (surgical pathology case summaries); and SNOMED CT's Surgical Pathology Working Group.</p>	<p style="text-align: right;">Web Teleconference: \$225/person</p>
<p>Tailored Services (education and consulting): CAP STS' expert team of clinical and technical consultants provide a comprehensive suite of customized health information management services to help clients navigate today's complex, ever-evolving health care environment and achieve optimal, enterprise-wide solutions for information exchange.</p>	<p style="text-align: right;">Contact your Account Manager or snomedolutions@cap.org</p>
